Yash Bhardwaj

Delhi, India | yashbhardwajj01@gmail.com | +91 9588102103 | LinkedIn | GitHub | Portfolio

Education

Guru Gobind Singh Indraprastha University Aug 2023 – Jul 2027
Bachelor of Technology, Information Technology | **CGPA: 8.2/10** New Delhi, India

Technical Skills

Languages: C++, Java, Python

Frontend Technologies: HTML, CSS, Tailwind, JavaScript, React, Next.js

Backend Technologies & Database: NodeJS, ExpressJS, REST APIs, JWT, MySQL, PostgreSQL, MongoDB, Prisma, Mongoose

Machine Learning: Pandas, NumPy, CNNs, YOLO, Object Detection, Regression & Classification, Data Visualization

Tools: pgAdmin, Git, Postman, Linux, GitHub, Docker, MinIO, Claude Code, Gemini

Experience

Software Engineering Intern | *Bhagwan Parshuram Institute of Technology* Jul 2026 – Aug 2026

- Centralized academic tracking for the IT department by engineering the Student Achievement Management System (SAMS), replacing legacy manual tracking workflows.
- Architected modular portal features to improve data accessibility, reducing navigation friction and minimizing user-reporting errors by an estimated 30%.
- Streamlined administration and reduced manual data-entry overhead by 40% through the digitization of records and implementation of role-based access controls.

Projects

BhejaFry – A Trivia Game Web App | *React.js, Node.js, PostgreSQL, Socket.io, Redis, Docker* *bhejafry.fun*

- Engineered a real-time multiplayer trivia platform with concurrent rooms and live chat using React.js and Socket.io, achieving sub-50ms latency.
- Optimized API latency by 50% and database read loads by 60% using a scalable Node.js backend with PostgreSQL, Prisma ORM, and Redis caching.
- Decreased deployment time by 40% and ensured rapid media delivery by containerizing the application with Docker and integrating MinIO object storage.

Yash.Album – Social Media Web App | *React, Node.js, MongoDB, Redux Toolkit, Cloudinary* *yash.album*

- Enhanced user engagement by developing a responsive social platform for photographers using React, Tailwind CSS, and Framer Motion for fluid UI rendering.
- Accelerated page load speeds by 1.5s and compressed media files by 70% by streamlining image processing pipelines with Cloudinary and Sharp.
- Secured platform access and session data by constructing a Node.js/Express backend with custom JWT authentication and bcrypt hashing.

Achievements

- Engineered optimized solutions for 350+ data structure and algorithmic challenges across LeetCode, Codeforces, and CodeChef.
- Ranked in the top tier among 150+ competing teams in the Smart India Hackathon (SIH) 2024 Internal Round.

Certifications & Trainings

- **Machine Learning Summer Training**: Built regression, classification, and CNN-based computer vision projects applying data preprocessing and model evaluation techniques.
- **Next.js Full-Stack Development**: Developed Next.js applications, integrating OAuth for authentication and Prisma ORM for efficient PostgreSQL database management.
