

Yash Bhardwaj

Delhi, India | yashbhardwaj01@gmail.com | +91 9588102103 | linkedin.com/in/bhardwajjyash | github.com/Bhardwajjyash

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology, Information Technology | **CGPA: 8.2/10**

Aug 2023 – Jul 2027

New Delhi, India

Technical Skills

Languages: C++, Java, Python

Frontend Technologies: HTML, CSS, Tailwind, JavaScript, React, Next.js

Backend Technologies & Database: NodeJS, ExpressJS, REST APIs, JWT Authentication, MySQL, PostgreSQL, MongoDB, Prisma, Mongoose

Machine Learning: Pandas, NumPy, CNNs, YOLO, Object Detection, Regression & Classification, Data Visualization

Tools: pgAdmin, Git, Postman, Linux, GitHub, Claude Code, Gemini

Experience

Software Engineering Intern | *Bhagwan Parshuram Institute of Technology*

Jul 2026 – Aug 2026

- Engineered the Student Achievement Management System (SAMS) under the mentorship of Dr. Manoj Kumar Gupta, centralizing academic tracking for the Information Technology department.
- Architected responsive frontend layouts and modular portal features, optimizing user navigation workflows and improving data accessibility for faculty and students.
- Streamlined administrative processes by digitizing achievement records, reducing manual data-entry overhead and ensuring secure, role-based access to institutional data.

Projects

BhejaFry – A Trivia Game Web App | *React.js, Node.js, PostgreSQL, Socket.io, Redis, Docker*

bhejafry.fun

- Built a real-time multiplayer trivia platform with React.js and Vite, engineering low-latency live gameplay, concurrent game rooms, and chat features via Socket.io.
- Orchestrated a scalable Node.js backend using PostgreSQL and Prisma ORM, integrating Redis caching for state synchronization to reduce database read loads by 60% and cut API latency by 50%.
- Containerized the application ecosystem with Docker and integrated MinIO for object storage, decreasing deployment configuration time by 40% and ensuring rapid media delivery.

Yash.Album – Social Media Web App | *React, Node.js, MongoDB, Redux Toolkit, Cloudinary*

[Live Link](#)

- Developed a responsive social platform for photographers using React, Tailwind CSS, and Redux Toolkit, integrating Framer Motion and Radix UI for fluid animations and interactive post components.
- Constructed a secure Node.js and Express backend with scalable MongoDB architecture, implementing custom JWT authentication and bcrypt hashing.
- Streamlined image processing using Cloudinary and Sharp, compressing media file sizes by up to 70% and accelerating page load speeds by 1.5 seconds.

Achievements

- Engineered efficient solutions for **350+** algorithmic challenges across **LeetCode, Codeforces, and CodeChef**, focusing on advanced data structure implementation and execution efficiency.
- Smart India Hackathon (SIH) 2024:** Qualified Internal Round among 150+ teams.

Certifications & Trainings

- Machine Learning Summer Training:** Applied data preprocessing, model training, and evaluation techniques to build projects involving regression, classification, CNN-based deep learning, and computer vision tasks.
- Next.js Full-Stack Development Training:** Developed end-to-end applications using Next.js, integrating OAuth for secure user authentication and Prisma ORM for efficient PostgreSQL database management.
